

DIGITAL SOLUTIONS TO ACCELERATE TREATMENT DEVELOPMENT

Oncology studies – such as leukemia and lymphoma – often involve multiple cohorts, various tumor types, scattered sites, and expensive medications. More importantly, patients face debilitating symptoms that can make participation difficult. That’s where Signant Health’s SmartSignals™ solutions can help. Our digital tools create a patient-centric clinical trial experience while helping you generate high-quality evidence.

GET STARTED IN JUST 8 WEEKS

We created a pre-configured eCOA solution that incorporates pre-validated library instruments, scientific design best practices, oncology-specific features, as well as our unrivaled global logistics and support.

It's 33% faster than other eCOA options and will reduce your costs by 20%.

GAIN RICHER INSIGHTS

By integrating Actigraph sensors and wearables with our eCOA solution, you’ll gain a continuous, real-time view of each patients’ health status and collect objective data on sleep and activity patterns. The additional data will enhance your understanding of the post-treatment recovery associated with each treatment cycle.

OPTIMIZE SUPPLY MANAGEMENT

Signant’s RTSM solution uses proprietary algorithms to optimize drug supplies for the complex study designs common in leukemia and lymphoma cancer trials. It also applies randomization adaptations seamlessly and protects the study’s blind.

CREATE A PATIENT-CENTRIC EXPERIENCE

We’ve thoughtfully created the SmartSignals solutions with patients in mind – everything from the software to the eCOA instruments’ overall designs. For example, the electronic formats ensure ease of use, such as larger, well-spaced buttons to compensate for treatment-related finger numbness.

SIMPLIFY THE CONSENT PROCESS

Our eConsent solution uses engaging multimedia to convey complex study information and permits patients to flag sections they need further clarification on. The digital tool efficiently handles the multiple consents and protocol amendments common in oncology trials, limiting the risk of audit findings.

Choose between a simplified, PDF-based consent form and a fully interactive, multimedia consent experience to fit your specific study needs.

At Signant, our SmartSignals solution suite was designed specifically to meet the needs of sponsors, sites, and patients.

DISCUSS YOUR NEXT STUDY WITH US

Our global team of therapeutic area experts advise on all areas of the clinical development process, including:

- Clinical science and medicine
- Data analysis
- Regulatory
- Operations and trial administration
- Global logistics
